Register free of cost to get the complete Tender details and download the document.

The challenges of technical education

*8 **Azheto Zhimomi (Dimapur-III):**

Technical Education, Election Technical education, the academic and vocational preparation of students for jobs involving applied

science and modern technology. It emphasizes the understanding and practical application of basic principles of science and mathematics, rather than the attainment of proficiency in manual skills that is properly the concern of vocational education. Technical education has as its objectives the preparation of graduates for occupations that are classed above

the skilled crafts but below the scientific or engineering professions. People so employed are frequently called technicians.
