Round the Clock Electricity Supply

22. Dr. KRISHAN LAL MIDDHA (Jind):

Will the Energy Minister be pleased to state:-

- a) the total number of the villages of the State in which the electricity has been supplied round the clock;
- b) the total number of the villages in Jind district and total number of the villages in Jind Assembly Constituency in which the electricity has been supplied round the clock; and
- c) whether it is a fact that Amarheri village is under Jag-Mag Yojna; if so, the reasons for not supplying round the clock electricity in the said village?

RANJIT SINGH, ENERGY MINISTER

Sir,

- a) There are total 5786 No. villages (2472 in DH+3314 in UH) in which round the clock electricity is being supplied in the State.
- b) In Jind District there are 22 villages getting round the clock electricity supply. No village in Jind Assembly Constituency is getting round the clock electricity supply at the moment.
- c) Yes, Amarheri village has been covered under Mhara Gaon Jagmag Gaon Scheme. 11 kV Amarheri RDS feeder connects a total of 3 villages namely Aherika, Amarheri and Kair Kheri. Out of these three villages, work of Jagmag Yojna on 2 No. villages namely Aherika and Amarheri has been completed as per Guidelines of Mhara Gaon Jagmag Gaon Scheme. But in one village namely Kair Kheri work is pending due to problem in shifting of meters outside the consumers premises. As and when the work on village Kair Kheri will be completed as per Guidelines of Mhara Gaon Jagmag Gaon Scheme and T&D losses are reduced / achieved to 20% or less, round the clock electricity supply i.e. 24 Hours Supply will be given to 11 kV Amarheri RDS Feeder/ Amarheri Village as per the provision of the Scheme.
